

Meridian Police Emergency Access – UDC 11-4-3-27G

Code requires the ability for emergency police access into climate controlled multi-family developments through the use of a Schlage MTK15 multi-technology keypad or access control keypad equivalent. This will allow police access, if there is an emergency, into the building if someone isn't able to come to the door.

Placement of these access control keypads shall be installed next to each main entry point of the building(s).

Police can work with the applicant on placement of the access control device(s). Contact Lt. Shawn Harper at sharper@meridiantcity.org

The Schlage or similar product allows for the integration of tenant access through the multi-technology capabilities.

Schlage MTK15

Physical dimensions (HxWxD): 5.1" x 3.25" x 0.7
Frequency: 13.56 MHz and 125 kHz
System Interface: Wiegand / Clock & Data / OSDP /
Optional RS-485 capability
Standard default PIV Output: 75 bit†
Standards: ISO 14443A, 14443B, 15693
Power: 5-16 VDC
Wiring: 18 AWG, 5 conductor stranded/shielded
LED (red/green/amber) visual indicator

ESSEX Access Control SKE-34S

Physical dimensions: (HxWxD): 5.125 x 3.375 x .44
Power: 12 to 24V DC; 5 V DC
Material: Stainless Steel or Black
Max User Code: 500
Weather Resistant
Anti-Tailgating; Manual or Timed Latching; Remote Bypass/Request to Exit (REX); Tamper Alarm; Time Zone/Restricted Access Input
1 SPDT Relay rated at 2A at 24V max and 2 Open Collector ¼ A max to ground
